HDHP PREVENTIVE DRUG LIST

Effective January 1, 2026

This preventive medication list is a subset of formulary products that are commonly prescribed for preventive purposes. Preventive medications help protect against or manage a medical condition. Coverage of all medications may still be subject to your high deductible health plan (HDHP) limits, benefit requirements, exclusions and out-of-pocket requirements.

Capital Rx works with your plan to provide certain medications at zero or low cost before meeting your deductible. Not all strengths, dosages, or categories of medications are provided at zero or low-cost, and not all strengths, dosages, or categories will be covered. Please visit cap-rx.com/member-tools to view a complete list of formulary medications, and if there are any questions about your particular prescription drug benefits, please call the number on the back of your card.

Please note: A prescription is required for over-the-counter (OTC) product coverage without cost-sharing under the pharmacy benefit.

- Medications that require Prior Authorization or Step Therapy are indicated with an *.
- Some strengths and/or formulations may not be covered.
