

Liberty Specialty DRUG LIST

Effective September 1, 2025

This is the Capital Rx specialty medication list. Specialty medications often have a higher copay. Both oral or injectable specialty medications are typically used to treat complex chronic conditions that require close monitoring or management. A limited distribution drug, or LDD, is a specialty medication that is complicated to manage and may only be available at select specialty pharmacies.

The list is maintained by Capital Rx and will be continually reviewed and updated as changes are made in the market.

This list may have medications not covered under your prescription drug benefit plan. To view the complete listing of covered products please visit cap-rx.com. If you have any questions about your prescription drug benefit, please call the number on your ID card.

- Brand name products are CAPITALIZED
- Generic products are lowercase
- Medications that require Prior Authorization or Step Therapy are indicated with an *.
